ANANTH HARIDAS

Operations Analyst & Customer Support
an47th.pi77ai@gmail.com · +91 9187084093 · Bengaluru, India
Portfolio & Projects: an47th.github.io/Ananth_Pillai-Portfolio

PROFESSIONAL PROFILE

Operations Analyst with experience across case investigation, documentation-driven risk review, escalation management, and data-informed process improvement. IIBF-certified in AML & KYC, with hands-on experience investigating operational exceptions, troubleshooting customer account discrepancies under SLA, and building the SQL/Excel/Tableau/Power BI layer that surfaces risk signals early. Comfortable owning a case or a metric end-to-end, from triage and documentation through escalation, resolution, and reporting.

CERTIFICATIONS

- AML & KYC (Indian Institute of Banking and Finance, Sep 2026)
- SQL (Basic), HackerRank
- AI Tools Workshop, Be10x

KEY PROJECTS

AML Transaction Monitoring, KYC and Risk Operations | SQL, Python, Advanced Excel, Tableau, Power BI

- Built a six-rule SQL detection engine, an Excel risk-scoring dashboard, and a documented investigation framework (customer/data profiling, behavioural baseline analysis, disposition criteria) that took 26 flagged accounts through structured case review; a Tableau dashboard tracks alert-rule trigger trends and outcome disposition.
- Built a Python KYC risk-scoring engine on synthetic data with transaction-monitoring rules and a five-sheet Excel report.

India Football Performance Analysis Dashboard, 2014–2024 | Tableau

- Built a Tableau workbook analyzing a decade of historical ranking and squad performance data across six views: rank and rank-change trend, win % trend, points per match, goal difference, squad-age progression, and a U23-debutant talent-pipeline signal.

COMPETENCY SNAPSHOT

- **Risk & Case Investigation:** Root-Cause Investigation · Case Documentation & Trackers · CDD/EDD-Style Review · Activity Monitoring · Anomaly Detection (SQL, MySQL, MongoDB Compass)
- **Dashboarding & Data Visualization:** Tableau, Power BI
- **AI:** AI-Model Output Validation and Continuous Improvement
- **Customer Support & Escalation:** Ticket Resolution, SLA Adherence, Escalation Handling, Troubleshooting
- **Data & Operations:** Data Collection, Cleaning & Preparation (ETL) · Operational Excellence & Process Optimization

PROFESSIONAL IMPACTS

- Investigated operational exceptions and customer account discrepancies, documenting root cause and troubleshooting steps to ensure accurate resolution and reduce operational risk.
- Built and maintained operational dashboards to monitor account-level activity and anomalies, consolidating scattered data sources into a single monitoring view used for daily decision-making.
- Escalated and resolved customer support tickets within SLA, validating AI-generated recommendations, documenting edge cases, and collaborating with the product team to improve model accuracy.
- Reduced AI agent response time by 25% per case by adding a new feature to the product.
- Standardized case-documentation and escalation workflows as part of a broader process-improvement initiative, reducing process turnaround time from 30 days to 7 days (75% faster process turnaround time).

PROFESSIONAL EXPERIENCE

FinanceOps | Operations Analyst | Fixed-term contract — May 2026 – Aug 2026

- Investigated customer queries and support tickets, analyzed account-level data, and collaborated with internal teams to drive timely resolution within SLA and operational improvements.
- Validated AI-generated recommendations, identified inaccurate predictions and edge cases, and provided structured feedback to improve AI-driven decision making.
- Drove a process improvement that reduced AI agent response time by 25% per case by adding a new feature to the product.

Invensis Technologies | Executive — Mar 2025 – Sep 2025

End-to-end business operations with data-governance-adjacent responsibilities: process controls, client documentation, and structured reporting in an outsourced services environment.

- Investigated and resolved data discrepancies and process exceptions across 20–25 monthly operational cycles, applying a consistent anomaly-detection and root-cause method.

- Built operational dashboards to track activity patterns and flag irregular or overdue account activity, functioning as an early-warning monitoring layer.
- Led client onboarding documentation and system data structuring, producing clean, traceable records that downstream risk and vendor-review processes depend on.
- Coordinated with multiple stakeholders end-to-end, owning requirement gathering, escalation, and resolution across the reimbursement cycle, cutting turnaround time (TAT) from 30 to 7 days, a 75% reduction in TAT.

Venkatesh & Raghavendra Chartered Accountants | Compliance Executive | Internship May 2024 – Jun 2024

- Worked on day-to-day compliance tasks at a chartered accountancy firm.
- Performed forensic bank statement analysis as per client requirements.
- Prepared compliance regulatory reporting as per client requirements.

BGK Advisory (deployed to Wipro) | Process Executive Sep 2022 – Jul 2023

Large-scale enterprise operations focused on data integrity, multi-currency data matching, and audit-readiness of operational records.

- Drove a 95% reduction in unmatched data records by systematically investigating and resolving high-volume data exceptions across multi-currency datasets.
- Performed cross-system data reconciliation by tracing record IDs across multiple systems, investigating unmatched entries, resolving discrepancies, and strengthening data accuracy.
- Prepared quarter-end reporting packages in an enterprise ERP system, ensuring reported figures held up under external scrutiny.
- Investigated cross-entity data flows across multi-unit structures, gaining direct exposure to layered, multi-source data patterns.

Areej Securetech LLC | Operations Executive | Dubai, UAE Dec 2020 – Jan 2022

- Managed day-to-day operations, including invoicing and floor handling.
- Supported business development efforts alongside daily operations.
- Handled business reporting, preparing regular reports on day-to-day operations.

SKILLS & TOOLS

- **Risk & Analytics:** Activity Monitoring · Risk-Based Reporting · Anomaly Detection · Case Investigation & Documentation
- **Customer Support & AI Ops:** Ticket Resolution · SLA Management · Escalation Handling · Troubleshooting · AI Output/Model Validation · Prompt & Workflow QA · Cross-Functional Coordination · Stakeholder Management
- **Data Analytics & BI:** SQL · Tableau · Power BI · Excel (Advanced)
- **Reporting & Operations:** Data Reconciliation · Variance Analysis · MIS · Multi-Currency Data Workflows · Reporting Package Preparation · Process Optimization
- **ERP & Systems:** SAP ERP · MySQL · MongoDB · Helpscout · Microsoft Office 365 · Qonto · Wise
- **AI Tooling:** Claude · ChatGPT · Gemini, applied to workflow automation, research and analysis, and documentation

EDUCATION

B.Com, Business & Finance | MG University, Kerala
