

ANANTH PILLAI

Data Analytics · Business Intelligence · Risk & Ai Operations

an47th.pi77ai@gmail.com · +91 7736658011 · Bengaluru, India.  [Portfolio & Projects](#)

PROFESSIONAL PROFILE

Ai Operations Analyst with 4+ years of experience in finance operations, reconciliation, payments investigation, AI-assisted workflow validation, and process improvement. Skilled in, SQL, Tableau, Advanced Excel and operational reporting, with a strong interest in Business Analytics, Data Analysis, and Risk investigation. Experienced in customer support ticket resolution, SLA-driven query handling, and validating AI model outputs for accuracy — bridging operational analytics with AI-assisted customer operations.

COMPETENCY SNAPSHOT

- Data Analytics & Financial Data Interpretation (SQL, MySQL, MongoDB Compass)
 - Dashboarding & Data Visualization (Tableau, Advanced Excel)
 - AI-Model Output Validation and Continuous Improvement
 - Customer Support & AI Operations (Ticket Resolution, SLA Adherence, AI Output Validation)
 - Data Collection, Cleaning & Preparation (ETL)
 - Transaction Monitoring and Investigation
 - Operational Excellence & Process Optimization
-

PROFESSIONAL IMPACTS

- Collections strategy through data analysis, customer communication, customer support workflows, and process optimization.
- Extracted, validated, and analyzed operational data to develop dashboards and reports, enabling performance monitoring, operational insights, and data-driven operational decision
- Built operational dashboards to monitor collection performance, transaction trends, and account-level anomalies for data-driven decision-making.
- Investigated payment exceptions and customer account discrepancies, ensuring accurate account resolution and reducing operational risk.
- Validated AI-generated recommendations, identified inaccurate predictions, documented edge cases, and collaborated with the product team to improve model accuracy and decision quality.
- Contributed to process improvement initiatives by standardizing operational workflows and supporting automation efforts, reducing reimbursement turnaround time from 30 days to 7 days.

Operations Analyst | AI Powered Fintech

May 2026 – Present

FinanceOps

In a transitional role

- Validated AI-generated collection recommendations, identified inaccurate predictions and edge cases, and provided structured feedback to improve AI-driven decision making.
- Investigated payment-related queries and customer support tickets, analyzed account-level data, and collaborated with internal teams to drive timely resolution within SLA and operational improvements.

Finance Operations & Business Support

Mar 2025 – Sep 2025

Invensis Technologies

End-to-end finance operations with compliance-adjacent responsibilities — process controls, client documentation, and audit-ready reporting in an outsourced services environment.

- Investigated and resolved payment discrepancies and reconciliation exceptions across 20–25 monthly reimbursement cycles, applying the same anomaly-detection and root-cause method used in payment risk and credit exception reviews.
- Built AR dashboards to track transaction patterns and flag irregular or overdue account activity — functioning as an early-warning monitoring layer.
- Led client onboarding documentation and ERP data structuring (COA setup), producing the clean, traceable records that credit risk and vendor due-diligence reviews depend on.
- Compiled monthly variance and MIS reports for senior leadership, building the structured, evidence-backed narrative business and risk reporting requires.
- Coordinated with multiple stakeholders end-to-end — owning requirement gathering, escalation, and resolution — mirroring case-management workflows used in payment operations and credit risk resolution.

Reconciliations Analyst (R2R & Audit)

Sep 2022 – Jul 2023

BGK Advisory — deployed to Wipro

Record-to-Report operations in a large enterprise — GL integrity, multi-currency reconciliation hygiene, and statutory audit readiness.

- Drove a 95% reduction in unreconciled items by systematically investigating and resolving high-volume GL exceptions across INR and foreign-currency accounts.
- Performed bank reconciliations by tracing transaction IDs across banking systems, investigating unmatched transactions, resolving reconciliation exceptions, and strengthening reconciliation accuracy.
- Prepared quarter-end and statutory audit packs in SAP, ensuring reported figures held up under external scrutiny.
- Investigated intercompany flows across multi-entity structures, gaining direct exposure to the layered transaction patterns used in credit risk and exposure analysis

Business Process Executive — Finance & Operations

Sep 2020 – Aug 2022

Marshall Autocare LLC · Dubai, UAE

Cross-border multi-currency finance and operations in a UAE-based business — built reporting infrastructure and managed vendor financial relationships from scratch.

- Investigated and reconciled multi-currency transactions across international accounts, building working knowledge of cross-border payment flows, correspondent banking, and FX exposure central to payments and credit risk assessment.
- Maintained a 100% on-time vendor payment record, reflecting the documentation discipline compliance-driven environments demand.
- Built cash flow, revenue, and expense MIS used for budgeting, creating structured records suited to audit and regulatory review.
- Investigated cost and margin variances across branches, sharpening the pattern-recognition skills central to credit risk and business analytics.

Cost Analysis and Business Support

Apr 2019 – Sep 2020

Ardent Business Consultancy · Kochi

- Investigated AR ageing for international clients (UAE & Saudi Arabia), tracking cross-border receivables and counterparty payment obligations.
- Executed inventory transactions in Odoo ERP, maintaining accurate records and control trails.

Internship — Statutory, Indirect Tax & Forensic Reconciliation

May 2024 – Jun 2024

Venkatesh & Ragavendra Chartered Accountants

This engagement included a forensic financial analysis exercise directly aligned with credit risk and data investigation methodology:

- Led a forensic look-back across 5 years of bank statements for Mantri Developers to reconstruct transaction timelines, identify gaps, and determine outstanding tenant refund liabilities — functionally the same exercise as a credit risk transaction look-back review.
- Performed GST reconciliation, ITC computation, and statutory filings (ESI, EPF, Professional Tax), gaining hands-on exposure to India's statutory and regulatory compliance infrastructure.

QUANTIFIED IMPACT

95% Drop in Unreconciled Items | 83% Faster Reconciliation Cycle | 75% Faster Reimbursement TAT

30%+ QoQ Operational Performance | 25% Reduction in AI Agent Response Time

SKILLS & TOOLS

Risk & Analytics Transaction Monitoring · Variance & Trend Analysis · Risk-Based Reporting · Anomaly Detection Statutory Compliance

Customer Support & AI Ops: Ticket Resolution · SLA Management · Escalation Handling · AI Output/Model Validation · Prompt & Workflow QA · Cross-Functional Coordination

Data Analytics & BI: SQL (HackerRank -Medium) · Tableau · Excel (Advanced , VBA)

Reporting & Operations: Bank Reconciliation · Variance Analysis · MIS · Multi-Currency Payments · Wise · Qonto · Cross-Border FX Workflows · Audit Pack Preparation · Process Optimization

ERP & Systems: SAP ERP · Oracle DB · MySQL · MongoDB · Production Environment

AI Tooling: Claude AI · ChatGPT/OpenAI · Gemini AI — applied to workflow design, data analysis, and documentation.

KEY PROJECTS

- **Transaction Monitoring, Investigation ,Risk Operations**— built a six-rule SQL fraud detection engine, an Excel risk-scoring dashboard, and a documented investigation framework (customer/transaction profiling, behavioural baseline analysis, disposition criteria) that took 26 flagged accounts through to 1 drafted SAR narrative; a Tableau dashboard tracks alert-rule trigger trends and false-positive vs. escalated vs. SAR-filed outcomes. (SQL, Advanced Excel, Tableau)
- **India Football Performance Analysis Dashboard, 2014–2024** — built a Tableau workbook analyzing a decade of FIFA historical ranking and squad performance data across six views: rank and rank-change trend, win % trend, points per match, goal difference, squad-age progression, and a U23-debutant talent-pipeline signal. (Tableau)

Certifications (in progress): Certificate Examination in AML and KYC by Indian Institute of Banking and Finance .(October 2026)
